

Uncommon Challenges UNCOMMON CARE

We know ventilator liberation and rehabilitation can be a difficult and challenging time for patients and their families. Our unit provides patients with a licensed respiratory therapist, along with a team of physical therapists, occupational therapists and speech language pathologists providing rehabilitation multiple times every day.

Our medical team also consists of:

- Board Certified Physicians
- Critical Care and ACLS Certified Nurses
- Dietitians
- Psychiatrists
- Case Managers
- Consulting Physicians

"I know what these patients are feeling. I once felt like my life was on hold, but I used that experience to find a new purpose. I'm living proof that there's more life ahead, and I want to help these patients stay positive and keep fighting — just like my respiratory therapist did for me."

Katie H.

Former Patient, TriVent Healthcare's Special Care Unit at University of Alabama at Birmingham Hospital

Our Expertise and Commitment ARE UNMATCHED

We centralize ventilator dependent patients into a specialized care unit, enabling us to assemble a concentrated team of healthcare providers all dedicated to accelerating patient recovery. This approach ensures a monitored and controlled environment, offering personalized care with immediate access to both acute and critical care.

The outcomes are nothing short of world-class:

The average length of stay in a TriVent Unit is 22 days, a 32% reduction from the national average.

Our ventilator liberation rate is 85%, more than 40% higher than the national average.

Within 30 days of discharge, our readmission rate is less than 7%. That is nearly 80% lower than the national average.

Our success means your loved one has a greater chance of returning home quickly and easing back into daily life.

Cliff T.

Former Patient,
TriVent Healthcare's
Special Care Unit at
University of Alabama
at Birmingham Hospital

"I had a lot of support from my family and the TriVent team, but my number one motivation was seeing my four-month-old son. Getting discharged — with a clap out from TriVent — put me one step closer to my baby boy."

Therapy | Liberation | Recovery

One Unit. One Mission.

ONE TEAM YOU AND YOUR FAMILY CAN RELY ON

Our individualized case management philosophy guides patients and their families through various choices, providing a level of care and comfort in equal measure. This process, which enables families to participate in the plan of care, has been proven to accelerate your loved one's physical and emotional recovery.

OUR SERVICES INCLUDE:

- 24-hour care and access to on-site physicians and emergency medical services
- Daily visits by board-certified attending physicians and specialists
- Interdisciplinary weekly rounds with the patient, patient's family, physician(s) and the TriVent medical team
- Ventilator liberation, rehabilitation and support
- Rehabilitation services six days a week (physical, occupational and speech therapy)
- Acute medical management
- Surgical services
- Cardiac monitoring

World-Class Care Leads to **UNPRECEDENTED OUTCOMES**

As the leading provider of ventilator liberation and pulmonary rehabilitation, we've spent over 30 years partnering with hospitals to bring families peace of mind. Our approach improves recovery time, reduces hospital stays, and lowers the risk of readmission for medically complex patients.

What sets us apart is our dedicated team, focused entirely on your loved one's care. We're not just treating patients—we're helping families reunite sooner.

Javier L.

Former Patient,
TriVent Healthcare's
Progressive Care Unit
at Tampa General Hospital

"I am so incredibly grateful for the PCU team at Tampa General Hospital. Their commitment and round-the-clock care is why I am free of my ventilator and ECMO machines, and most importantly, reunited with my family."

Our Customized Care **LEADS TO SUCCESSFUL PATIENT RESULTS**

We provide on-site evaluations of patients and accept most insurance policies, as well as Medicare and Workers Compensation.
